SULEIMAN ELKINDY

Software Engineer

Nairobi, Kenya | +254 743 298 440 | Email | Portfolio | Github | LinkedIn

PROFESSIONAL SUMMARY

Computer Science graduate from Zetech University with hands-on experience in software engineering, IT systems management, and automation. Proven across government and private sector environments, building REST API-backed web applications, OCR automation pipelines, and full-stack tools.

PROFESSIONAL EXPERIENCE

Freelance Software Engineer | Self-employed | Sep 2025 – Present

- Delivered 3 websites and custom software tools for individual and small-business clients using React, PHP, and MySQL.
- Provide ongoing IT and hardware support — diagnostics, OS recovery, chip-level troubleshooting, and network support.
- Own projects end-to-end: requirements, build, deployment, and client support.

Software Developer & IT Systems Manager | Nairobi City County Government — Finance & Licensing | Jun 2025 – Aug 2025

- Built a Flask/Python REST API web app that automated bill record-keeping for 4 Finance staff, reducing processing time from a full day to ~2 hours.
- Integrated pytesseract OCR to extract bill data automatically, outputting results to Excel with a Word document flagging low-confidence fields for manual review.
- Supported systems administration, database management (MySQL), and network/cloud infrastructure.

Assistant IT Intern | Siginon Group Limited | Jan 2025 – Apr 2025

- Provided technical support across hardware, software, and network issues in a logistics enterprise environment.
- Assisted with system maintenance, installations, and updates across multiple endpoints.

EDUCATION

Bachelor of Science in Computer Science — Zetech University, Nairobi, Kenya

TECHNICAL SKILLS

Programming: Python, C, C++, PHP, JavaScript
Software & Web Development: HTML, CSS, JavaScript, React, Node.js, Flask, REST APIs, Agile, Unit testing
Databases: MySQL, MariaDB, SQLite, MongoDB
Systems & IT: Systems Administration, Network Support, Hardware Diagnostics, Chip-Level Programming
Tools & Platforms: Git, GitHub, VS Code, Linux, Windows, Docker, CI/CD, AWS, Azure
Networking: Wireshark, Nmap, SSH, PuTTY, AnyDesk, SNMP

PROJECTS

AI-Assisted Bill Recording System — Python, Flask, pytesseract OCR, openpyxl

- OCR pipeline that scans bill documents, auto-extracts key fields, outputs structured Excel data, and flags low-confidence results for human review.

AAirline — HTML, CSS, JavaScript | silver-spork-ruby.vercel.app

- Fictional Kenyan airline booking site with flight search, interactive seat map, and full checkout including simulated M-Pesa payment.

Fuzzy Couscous — Pharmacy POS System — C++

- Terminal-based POS built from a full requirements spec — product lookup, discount calculation, payment, receipt printing, and live inventory updates.

CERTIFICATIONS & ACHIEVEMENTS

- Ethical Hacking — Udemy
- Machine Learning — Udemy
- Embedded Systems Programming — Udemy
- Cybersecurity hands-on practice — TryHackMe (ethical hacking labs & CTF rooms)
- Python Programming and Web Development — freeCodeCamp, 2024
- Top 10 Finalist, Zetech University Hackathon 2023
- Active member, Zetech Computer Science Club
